

MONTHLY WEATHER REVIEW.

NOVEMBER, 1894.

PROF. CLEVELAND ABBE, EDITOR.

CONTENTS.

	Page.		Page.
INTRODUCTION	441	ATMOSPHERIC ELECTRICITY	459
Data used in preparing this REVIEW.		General statistics; Thunderstorms; Lightning; Auroras; Canadian data.	
CHARACTERISTICS OF THE WEATHER	441	METEOROLOGY AND MAGNETISM	460
ATMOSPHERIC PRESSURE	441	General remarks; Comparison of temperature with magnetic force.	
General remarks; Normal pressure; Diurnal variation; Departures; Movements of centers; High areas; Low areas.		SUNSHINE AND CLOUDINESS	460
NORTH ATLANTIC METEOROLOGY	445	INLAND NAVIGATION	461
Normal conditions; North Atlantic storms; Ocean ice; Ocean fog.		Stage of water in rivers.	
TEMPERATURE OF THE AIR	446	OBSERVATIONS ON THE GREAT LAKES	462
General remarks; Normals; Monthly means; Departures; Years of highest and lowest mean temperature; Maximum and minimum temperature; Daily and monthly ranges; Accumulated temperature; Diurnal periodicity; Limits of freezing weather; Periods of high and low temperature; Areas of 20° rise and fall; Cold waves; Dew and hoar frost; Frosts.		STATE WEATHER SERVICES	462
HUMIDITY	453	NOTES BY THE EDITOR	468
General remarks; Average humidity; Wet-bulb temperatures.		METEOROLOGICAL TABLES	465-485
PRECIPITATION	454	I. Climatological data, Weather Bureau stations; Ia. Temperature of the wet-bulb thermometer; II. Meteorological record, voluntary observers; III. Canadian data; IV a. Sunshine; IV b. Rainfall; V. Temperature; VI. Pressure; VII. Wind; VIII-IX. Resultant wind; Xa.-Xb. Selected voluntary stations; XI. Thunderstorms and auroras; XII. State weather services.	
General remarks; Normal; Current; Departures; Accumulated precipitation; Diurnal variation; Years of greatest and least precipitation; Excessive precipitation; Maximum rainfall; Frequency of excessive precipitation; Exceptional precipitation; Hail; Sleet; Snowfall; Snow on ground.		CORRECTIONS AND ADDITIONS	475
WIND	458	CHARTS—I. Tracks of centers of low areas; II. Isobars, isotherms, and resultant winds; III. Total precipitation; IV. Tracks of centers of high areas; V. Temperature and magnetic force; VI. Total monthly snowfall; VII. Depth of snow on ground.	
Prevailing directions; Resultant winds; High winds; Local storms; Wind signals for November.			

PREPARED BY DIRECTION OF
MARK W. HARRINGTON.
CHIEF OF WEATHER BUREAU.

PUBLISHED BY AUTHORITY OF THE SECRETARY OF AGRICULTURE.

WASHINGTON, D. C.:
WEATHER BUREAU.
1895.

NOTE.—All communications relative to the Monthly Weather Review should be addressed to the "Chief of Weather Bureau."
